Quality not Quantity

In selecting farm products for exhibit, choose only those specimens that are **uniformly** of good quality, form, color, true to type and free of all insect and disease blemishes and free from cuts and bruises.

Ribbons will be awarded mainly on the basis of quality. Products should be exhibited as neatly as possible in their natural state. For apple exhibits, it's helpful not to knock or shake fruit from the tree, but pick each specimen by hand, taking care not to pull out the stem.
